

Reconsidering Mill Creek

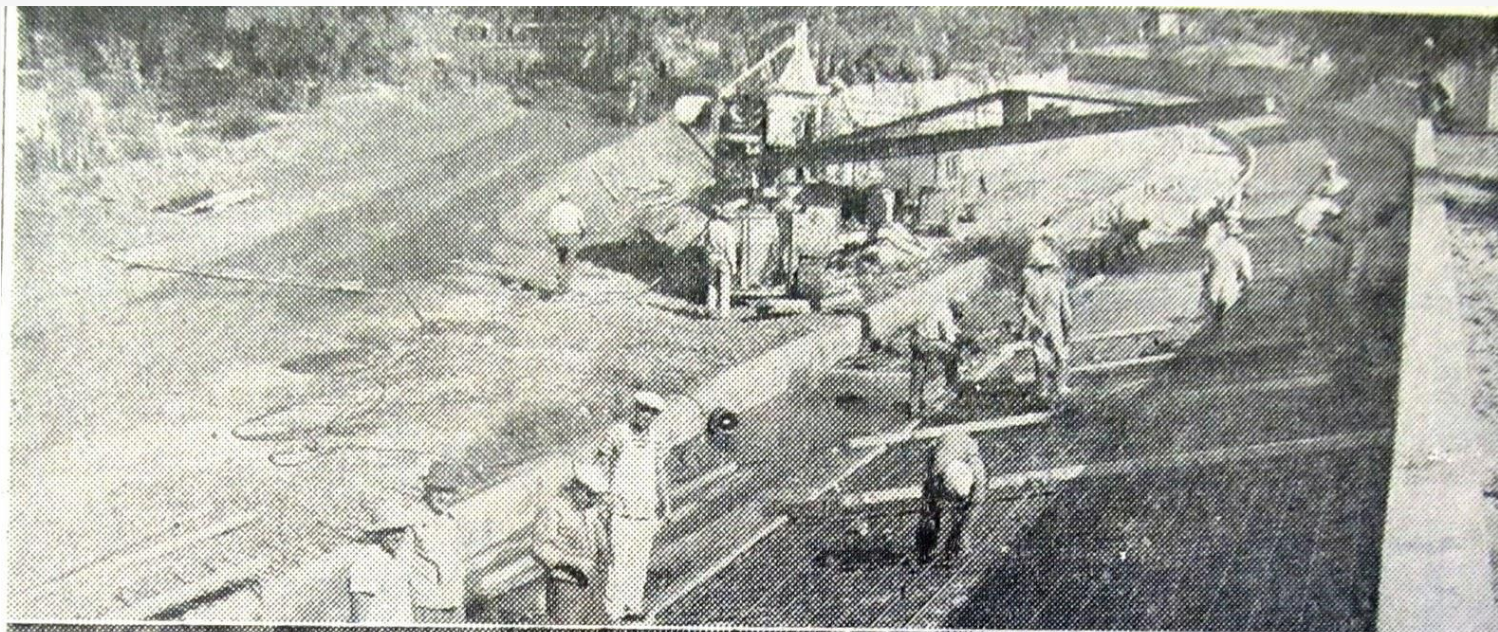

Phase I
Landscape Architecture
Fall 2014

Paving of Mill creek channel is making continuous progress as the contractor, Guy F. Atkinson Co., speeds work in order to complete the job before the winter rains set in. Upper photo shows concrete being poured on one of the side slabs, which slope from the outside retaining walls down to the center trench. As can be seen, the slab is reinforced with steel throughout. In the lower picture can be seen a section in which both the center trench and south slab have been completed, leaving only the north slab to finish the job.—(Staff photos, Davison engraving).

Woonerfs

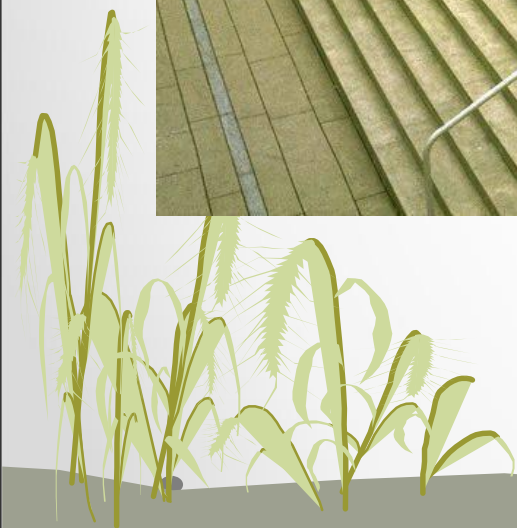

The image shows an aerial view of a city street grid with a blue river flowing through it. A red outline highlights a specific area along the riverbank, indicating a 'Woonerf' (shared space) project. The highlighted area includes a path and surrounding greenery. The background is a grayscale aerial photograph of a city street grid and buildings.
